

MODULE 1: INSTALL VS CODE AND PYTHON EXTENSION

The goal of this module is to get your computer ready to write and run Python code.

Setup

1. Install Python

1. Download from python.org
2. Check "Add Python to PATH" during installation.

2. Install Visual Studio Code (VS Code)

1. Download from <https://code.visualstudio.com/>

3. Install the Python Extension in VS Code

1. Open VS Code → Extensions tab (or `Ctrl+Shift+X`) → Search "Python" → Click **Install**

4. Verify Python Is Installed

1. Open Terminal in VS Code (`Ctrl + backtick`)
2. Type: `python --version` or `python3 --version`

Note

To open the terminal in VS code, type (`Ctrl + backtick`) or go to the top menu → **View** → **Terminal**.
